

Building Report, Rentals and Maintenance

The facelift is almost complete in the front of the building, except for the resin sidewalk completion and possible transom lighting. Hindbo Construction and Kevin MacMillan added the Kiosk out the front of the building. Posters are now displayed before each production and event. We are planning to complete a much needed dressing room renovation this upcoming season with a Go Fund Me Grant and board fundraising. This will include a new floor and cabinetry. The kitchen also requires new tile and this will be replaced in the upcoming months.

Craig Massey helped to place metal siding over the last of the cedar siding behind the alley gate. It is now much warmer and fireproof. We have a new building maintenance volunteer, Ray Perreault, who has taken on cleaning up and repairing the ramp area. He has also repaired and painted the east side of the building. We value these volunteers.

Fire inspections, furnace repairs, sprinkler system fixes, and air conditioning maintenance continue throughout the year. Jackie continues to help keep the chairs and floors in the house vacuumed when needed. The front of house carpets continue to be cleaned regularly.

The theatre does not host many rentals throughout the year as the stage is generally always busy. We had one rental for a music presentation in June and the MYST summer camp in July.
