

## Scene Shop Report 2019

In March of 2019 two work bees were held at the Shuswap Theatre, the first was convened to empty, clean, catalogue and organize our storage container. The joint efforts freed up additional space and allowed future set teams to understand what products were on hand.

The second focused on the scene shop. All materials were removed, additional shelving was installed and items were returned in a manner making future building tasks easier to accomplish.

In July of 2019 a capital project was undertaken by theatre volunteers to remove and dispose of the old stage. Once done, a new and improved stage was installed. The new sprung stage provides for a quiet and multi functional surface for future theatre and dance performances.
